

ALDENHAM SCHOOL

13 + Entrance Paper

SAMPLE PAPER

Mathematics

Length of Examination – one hour

Do not open until you are told to do so

Surname:	School:
First name:	Age: Years Months

INSTRUCTIONS FOR CANDIDATES

- Write your answers in the spaces provided in this booklet
- Show sufficient method to show how you obtained your answers
- Calculators MUST NOT be used in any question.

Work steadily through the paper doing as much as you can straight away. Then go back to work at the more difficult questions. Make sure you have attempted to answer all the questions. There are 36 questions on this paper.

	[2]
2.	Work out $\frac{5}{6} + \frac{1}{2}$, giving your answer in its simplest form
3.	[2] a. Work out 26 x 18
	b. Without any further calculations write down the value of
	0.26 x 180[1]

1. Work out 7.65 + 6 + 3.7

4. Work out	
a. $\frac{1}{4}$ of 3000	
	[41
h ³ -4 2000	[1]
b. $\frac{3}{4}$ of 3000	
	[1]
5. Write $6\frac{2}{7}$ as an improper fraction.	
	[1]
6. Fill in the missing number	
-7 - = -15	

.....[1]

7.

2 5 8 13 14 15 25 33 42 64

From the numbers in the box above, write down

a. the largest odd number

b. a square number	[1]
c. a prime number between 10 and 20	[1]
d. a multiple of 7	[1]

e. a number which is a square number AND a cube number

															[1]
							I	_	Ī	•)	t	а	al	,	5	1

.....[1]

9. Calculate $10 \div \frac{5}{8}$.	[2]
10. Fill in the missing number $8 - \boxed{} = 14$	[2]
	[1]

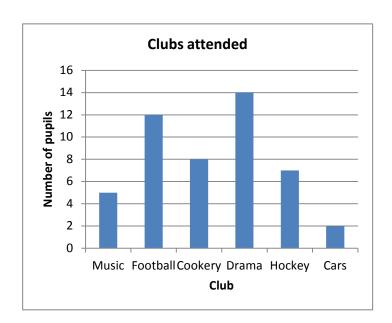

11.	Write 48 and 60 as products of their prime factors.								
		48 =							
		60 =[2]							
	Hence or otherwise, find the High- Lowest Common Multiple of 48 ar								
		HCF =							
		LCM =[2] [Total 4]							
12.	Write $\frac{5}{8}$ as a decimal								
		[2]							

Work out $\frac{3}{5}$ x $\frac{10}{21}$, giving your answer	in its simplest form.
A fleet of lorries are identical to each ne amount. Six lorries can carry 7 tonne or much stone can nine lorries carry?	
Which fraction is larger, $\frac{11}{12}$ or $\frac{10}{11}$? Or answer, showing any working that you	
	[2]
16	A fleet of lorries are identical to each amount. Six lorries can carry 7 tonne much stone can nine lorries carry? Which fraction is larger, $\frac{11}{12}$ or $\frac{10}{11}$?

need	Bill and Fred are brothers. Bill is 12 years old. Every week their mum gives them and to share between them in the ratio of the et money does Fred receive?	225 pocket which they
		[3]
17.	Simplify as far as possible: 9q – 4 + 13p	– 12q -7p + 5
		[2]
18.	Find the value of $3x^2 + 2x - 5$	
	when $x = 3$.	
	when $x = -3$	[2]
		[2] [Total 4]
19.	Solve the equation:	
	5x - 12 = 3	
		[2]

	•
Simplify as far as possible: 2p x 3q x 5p	£[2]
	[2]
Solve the equation: $\frac{x}{3} + 6 = 10$	
Multiply out the following bracket: $5(y-4) \label{eq:following}$	[2]
	[2]
	and an additional £15 an hour. What will for six hours be? Simplify as far as possible: $2p \times 3q \times 5$ Solve the equation: $\frac{x}{3} + 6 = 10$ Multiply out the following bracket:

24. The following bar chart shows information about the numbers of pupils attending clubs after school one day.

If one pupil is chosen at random, what is the probability that they attend a sports club after school?

.....[3]

25. Expand and simplify:

$$4(x+3)-2(x-5)$$

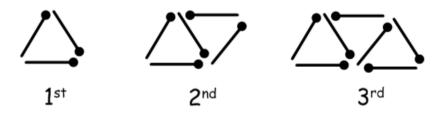

.....[2]

$3y^2 + x - 2y^2 + 3x$
[2]
27. To work out the cost of the electricity I use at home I need to multiply the number of units I use by 3 and then add 750 to get the cost in pence.
Write a formula for the cost C, in pence, of using n units of electricity.
[2]

Simplify as far as possible:

26.

(b) How many matchsticks would there be in the 7th shape?

(c) How many matchsticks would there be in the nth shape

(d) Hence or otherwise work out how many matchsticks there would be in the 50th shape.

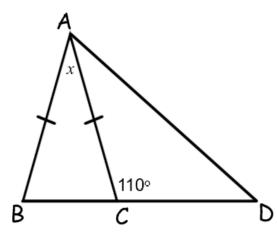

.....[2] [Total 8]

29.	Solve the equation	$\frac{5x}{4}$	= 2	5
-----	--------------------	----------------	-----	---

<i>x</i> =	[2]
------------	-----

30. Angle ACD is 110° . AB = AC. Work out the size of angle BAC.

Give reasons for your answer:

$$x = \dots [1]$$

.....

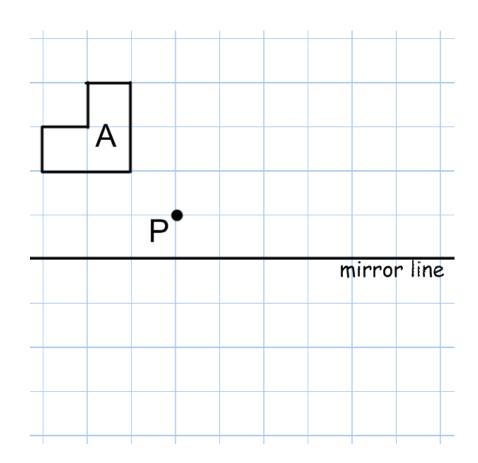

.....

[2]

[Total 3]

31.

a. Rotate shape A 90° clockwise about point P and label the image B.

[2]

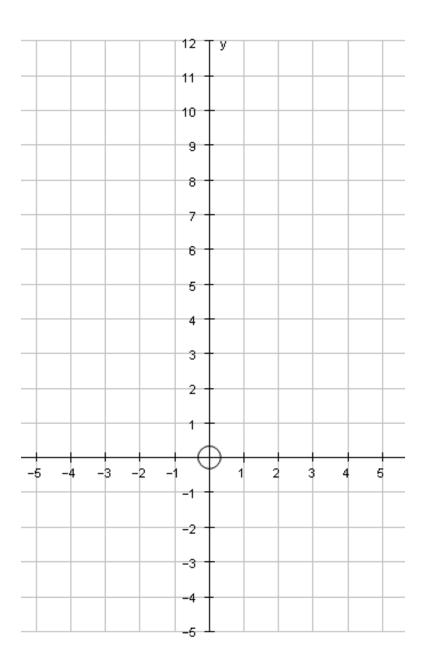

b. Reflect shape B in the mirror line and label the image C.

[2]

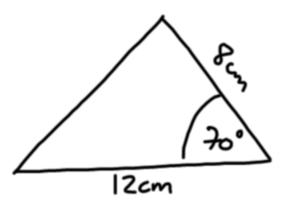

32. On the diagram below, draw the graph whose equation is y = 2x - 1. Make sure you complete the table of values first.

X	-2	1	3
у			

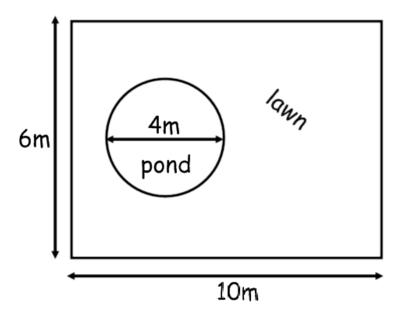

[2]

33. Here is a sketch of a triangle. Make an accurate drawing of the triangle.

34. Below is a plan of Mike's garden. It consists of a rectangular lawn with a circular pond in it.

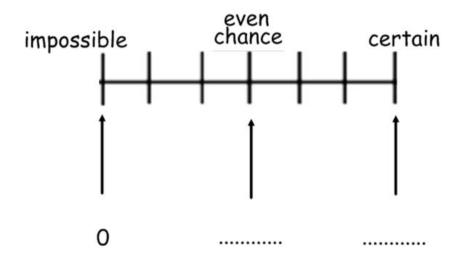

(a) What is the circumference of the pond (use π = 3)?

																				r	Υ	1	[2	2]	
--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	---	---	---	----	----	--

(b) Mike wishes to buy seed for his lawn. One box of seed costs £3.98 and covers 20m ² . How much will he need to spend on lawn seed? Show all your working out.

35. Look at the probability scale below.

a. Complete the scale by writing numbers to represent the probabilities for even chance and certain.

[2]

- b. On the scale above, mark the following probabilities with the letters shown:
 - A the probability that when a fair dice is rolled, the top face shows a number greater than 2.

[1]

B the probability that when a fair dice is rolled, the top face shows a square number.

[1]

[Total 4]

36. Railfares and Cheapfares are two websites selling train tickets.

Each of the websites adds a credit card charge and a booking fee to the ticket price.

Railfares

Credit card charge: 2.5% of

ticket price

Booking fee: 80 pence

Cheapfares

Credit card charge: 1.3% of

ticket price

Booking fee: £1.90

Nadia wants to buy a train ticket.

The ticket price is £60 on each website.

Nadia will pay by credit card.

Will it be cheaper for Nadia to buy the train ticket from Railfares or from Cheapfares?

[Total 4]
